Environmental focus throughout the product lifecycle is our commitment.

ENVIRONMENTAL POLICY

Powerbox should develop, produce, and market power supply products with minimal negative impact on the environment regarding climate, air, water and other resources.

This is achieved by:

- Continuously improving product efficiency when developing our products. This will lead to low energy consumption during the lifetime of the product, which will lessen the CO2 impact.
- Managing our supply chain and product selections by considering their environmental impact.
- Pushing our requirements back in the supply chain to secure that our suppliers meet our standards.
- Consistently decrease emissions by optimizing goods and personal transportation.
- Identifying, understanding and complying with all applicable environmental laws and regulations that affect our business operations.
- Minimizing waste by optimizing operations, promoting reusing and recycling, manage waste in an environmentally friendly manner.
- Reducing the potential impact on the environment through the adoption of robust controls for preventing air, ground, water and noise pollution.

Tatsuo Yamamoto, CEO
