## Powerbox Environmental Policy

Powerbox shall develop, produce, promote and market Power Supply products with minimal negative environmental impact.

This is achieved by:

- Managing our supply chain and product selections by considering their respective environmental impact
- Consistently decrease emissions by optimizing goods and personal transportation
- Using proactive environmental thinking throughout the entire product lifecycle considering longevity, power efficiency, and raw materials
- Identifying, understanding and complying with all applicable environmental laws and regulations that affect our business operations
- Protecting our environment and preventing pollution by managing our waste in an environmentally friendly manner

Our environmental activities will become company culture and shall be continuously improving by constantly reviewing and revising our environmental goals and policies.
